

SIHL

INK COMPATIBILITY

3277 SubliColor Premium comes from the latest generation of instant dry sublimation papers designed especially for the industrial high speed printers from Reggiani, MS-Italy, Durst, and Mimaki. Although Premium 85 can be used with most dye sublimation systems, SubliColor 3277 was specifically designed for aqueous sublimation inks with an increased content of high boiling substances (i.e. Ricoh and Kyocera print heads). The result is an instant dry sublimation paper with a high rate of color transfer for use with all commercially sold water based dye sub inks.

STANDARD SIZES

- Item # 3277000015J2 - 24"x50' - 3"core
- Item # 3277000031D8 - 44"x328' - 3"core

3277

SubliColor Premium

4 mil Matte Sublimation Paper

PHYSICAL PROPERTIES

Caliper Thickness	4 mil
Basis Weight	85 gsm
Finish	Matte

ADVANTAGES

- High Color Transfer
- Instant Dry
- Sharp Contour Definition
- Reduced Wet Cockling
- Excellent Flatness
- Fast Transfer Time

APPLICATIONS

- Fabric & Hard Surface Transfers
