

Large-Format Specialty Print Media

Premium Metallic Photogloss, 255gsm

This media is a micro-porous glossy photo paper with mica pigments in the coating that provides an unique metallic pearlescent image after printing with both dye or pigmented inks. The product is instant dry, with a resin-coated base paper that resembles the traditional professional metallic papers printed by the Prolabs with silver halide technology. This photo paper is ideal for portrait and landscape imagery and can be used for both color as well as black and white applications.

Canon Photographic/Glossy Papers

High-end photography and portraits demand excellent photographic paper, and imagePROGRAF offers a wide variety to meet virtually every printing need. Accurate clear reproduction of digital images is a breeze with imagePROGRAF photographic and glossy media options.

With imagePROGRAF media, you can count on consistently superb image quality and product performance. imagePROGRAF media goes through rigorous testing to ensure compatibility with Canon printers in order to provide the best image quality.

Applications

- Photography
- Posters
- POS signage
- Graphic Art Reproduction
- Exhibition graphics

THE RIGHT MEDIA FOR THE JOB

Whether you're drafting designs or producing point-of-purchase displays, signage, fine art and photo reproductions, imagePROGRAF has the right large-format media to satisfy virtually every market.
